This game is planned to be released on the Xbox Series X currently.

Game Overview

Theme / Setting / Genre

Core Gameplay Mechanics

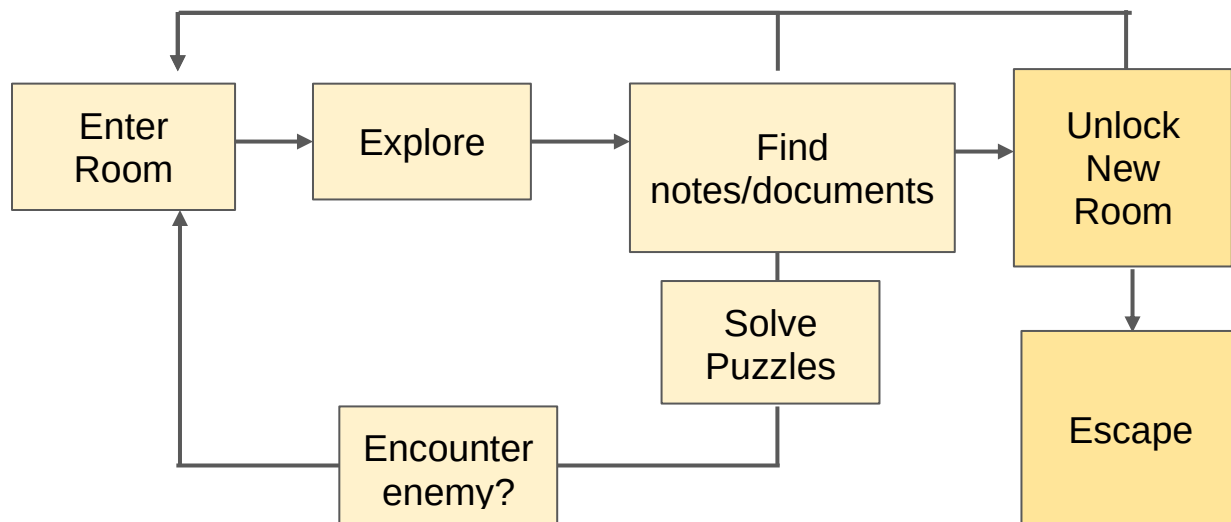

- This game takes its inspiration from the likes of Outlast, Resident Evil, Silent Hill and Layers of Fear series.

Story and Gameplay

Story

You are Patient0042, you have been taken by a mysterious group and have woken up in an abandoned hospital feeling the effects of some sort of experiment with the hospital appearing to be eerily quiet the player will have to explore the hospital with just a flashlight. The player's main task is to find collectibles such as notes/journals in order to uncover what is happening and find a way to escape.

Core Gameplay

6. **Game Over Screen**

Will display thanks for playing message upon death

Level Design Tools

Game will be created entirely with Unreal Engine 4 with 3D models being created with Maya.

First Time Experience

The first room in this game that the player wakes up in will be treated as a short tutorial room where the aim of the game is explained as well as all of the controller inputs. With this the health and inventory system will also be explained along all of this collecting items and solving puzzles will be explained. The player will have to complete tutorial steps in order to escape the first room in order to continue. The aim of this tutorial is to give the player the rundown of inputs, systems and how to progress along with the overall objective of the game to get to the end.
